

Brainstorming & Idea Prioritization Template

Date	26 June 2026
Team ID	xxxxxx
Project Name	Emotion Detection & Learning Support Engine
Maximum Marks	3 Marks

The project ideas were discussed and evaluated based on feasibility and importance. After comparing all the ideas, the **Emotion Detection & Learning Support Engine** was selected because it is easy to implement, useful for students, and meets the project objectives.

Step 1: Brainstorm and Idea Listing

Various project ideas related to **Artificial Intelligence, Natural Language Processing, and student learning support** were identified and grouped based on their category. This brainstorming process helped the team explore different ideas before selecting the final project idea.

S. No	Team Member	Idea / Suggestion	Category	Group No.
1	Jainulla Gari Syed Sakeena	Detect emotions from text	AI & NLP	1
2	Sadhu Mukesh	Suggest study materials based on emotion	Learning Support	1
3	N Yaswitha	Show emotion analysis results	Data visualization	2
4	M Sudhakar	Build a Streamlit web app	User Interface	3
5	Veeraballi Sairam	Save user learning history	Data Management	3
6	All Team	Emotion Detection & Learning Support Engine	AI, NLP and Machine Learning	1

Step 2: Idea Prioritization

The identified ideas were evaluated based on their feasibility and importance. After comparing all options, the **Emotion Detection & Learning Support Engine** was selected as the final project because of its practicality, technical feasibility, and ability to provide personalized learning support by detecting student's emotions and recommending appropriate guidance using Artificial Intelligence and Natural Language Processing techniques.

Group No.	Final Idea	Feasibility	Importance	Priority	Selected
1	Emotion detection using BERT	High	High	1	Yes
2	Personalized learning support with Gemini API	High	Medium	2	Yes
3	Voice-based emotion detection using speech input	Low	High	3	No
